

## Global Business Development & Licensing

A photograph of two women in an office setting. One woman with blonde curly hair is leaning over, smiling and looking at a laptop screen. The other woman with dark hair is sitting and smiling back at her. The background is a blurred office environment with a brown leather chair.

### *Our Partnering teams*

Our experienced business development professionals are committed to working with our partners to create collaborations that bring value for both partners. Don't hesitate to get in touch with us.

# We push the boundaries of science to deliver life-changing medicines

Inspired by our values and what science can do, we are focused on accelerating the delivery of life-changing medicines that create enduring value for patients and society

# Our global R&D centres

# Our business development activity takes many forms

## Collaborations, in-licensing and acquisitions

with peer companies, biotechs and academia to enhance our portfolio and pipeline in our main therapy areas.

## Out-licensing and divestment of medicines

that sit outside our main therapy areas and mature brands that can be deployed better by a partner. This allows us to maximise the value of our assets while ensuring patients have access to these medicines.

## Joint research centres

with leading academic institutes across the globe.

# Oncology scientific platforms

- New modalities & platform technologies
- Assets at all stages of R&D development
- Global & regional commercial partnerships

# Tumour types

# Therapeutic areas of interest in BioPharma

- New modalities & platform technologies
- Focus on clinical stage assets
- Commercial partnerships: global & regional
